Math 183 HW1, Name: Chandler Blaid Burgess **, PID:** A98029477

This homework set is nothing more than a test of the "homework pipeline". The below description is taken from the course syllabus:

For each assignment, you should **print the PDF** and **write your solutions** nicely on the paper printouts. Given the way Gradescope predicts where your answers are on the page, it is critical you write your answers on the printouts of the PDFs. If you decide to use your own page layout, Gradescope will not know what to do.

After solving the homework problems, you will need to **scan** your solutions and create a PDF. To do so, you can:

- Use a printer than also scans (you or a friend might have such a device)
- Go to certain libraries on campus (see "Scanning" here), or
- Download an app on your cell phone that uses your camera to make PDFs (see here).

After creating the PDF, make sure the quality is good and then **upload** it to Gradescope under the appropriate assignment. If you were enrolled in the course when I uploaded the roster, you should have received an email from Gradescope. If you joined the class late or did not receive the email, go to www.gradescope.com, sign up using your UCSD email address, and use the class entry code MVXGVM to add yourself to the class. The due dates for the assignments are listed on the class calendar on Triton Ed. The "due dates" listed in Gradescope will be 48 hours after those listed on the course calendar. These include the buffer window for personal and technology issues that could arise.

Remember: 1) Print, 2) Solve, 3) Scan, and 4) Upload.

To get credit for this assignment, you must clearly print your name at the top, add your student ID number, put check marks in the spaces below signifying that you have read and understand the statements, and fill in the final box. Then, scan your document and upload it to Gradescope.

✓ Because of how Gradescope electronically partitions my homework submission, I understand that I must write my answers in the space provided and never add or subtract pages.

✓ I understand that I should check the quality of my PDF scan before I upload it to Gradescope.

✓ I understand that the due dates/times for the homework assignments are on the course calendar, that I always get an extra 48 hours (at no penalty) for extreme circumstances that inevitably arise, that I don't need to ask for this extension, that Gradescope will lock me out after the 48 hour late window, that late submissions thereafter are not possible, and that emails asking for additional extensions will be ignored.

In the below space, write "Hello, DQ! This is my handwriting." Use whatever writing utensil (pen, pencil) you plan to normally use. You are going to check that your writing shows up after scanning.

Hello DQ! This is my handwriting.
